Azure Data Factory

Javascript

Work Experience

Fullstack Developer - dataaeaze systems

Sep 2025 - Dec 2025

dataaeaze systems

I am full stack developer currently working as Mahindra and Mahindra client.

Full-Stack Developer with experience in building real-time industrial monitoring systems for Mahindra using React, Node.js, OPC UA, and WebSockets. Strong in developing low-latency dashboards, REST APIs, and scalable enterprise applications for manufacturing environments.

Fullstack Developer - Softcode Technologies Private Limited

Feb 2023 - Sep 2025

Softcode Technologies Private Limited

Full Stack Developer with experience at Softcode Technologies Private Limited, building secure enterprise web applications using React, TypeScript, Node.js, and PostgreSQL. Skilled in role-based access control, workflow automation, REST APIs, and responsive UI development.

Internship

Jobby App - NxtWave

12 Months

- Developed the Jobby App, a user-friendly platform designed to streamline job search for users.

- Implemented secure user authentication enabling seamless login and personalized access.

- Integrated a comprehensive job listing feature with filters to enhance opportunity discovery.

Projects

Mahindra Industrial Monitoring System

3 Months

Mahindra Industrial Monitoring System

Project Description:-

Developed a real-time industrial monitoring and analytics system for Mahindra's manufacturing unit.

Integrated OPC UA industrial controllers with a React + Node.js web application.

Built live dashboards to monitor factory stations, pressure sensors, and pallet movement.

Implemented real-time data streaming using Socket.IO and WebSockets with sub-100ms latency.

Supported multi-user simultaneous monitoring over LAN.
Designed backend REST APIs and event-driven architecture using Node.js and Express.
Stored and analyzed monitoring data using SQL Server with optimized queries.
Delivered a responsive, high-performance UI for real-time factory floor visualization.

Key Skills / Technologies:-
React.js, Node.js, Express.js, OPC UA, Socket.IO, WebSocket, SQL Server, Sequelize, Vite, Real-Time Systems

PharmaCorp Access Management System

5 Months

PharmaCorp Access Management System

Project Description:-

Developed a full-stack access management system for a pharmaceutical enterprise to manage users, roles, departments, plants, vendors, and workflows.

Implemented secure role-based access control (RBAC) with authentication and authorization using JWT.

Built responsive dashboards for Super Admin, Admin, and Approver roles using React and TypeScript.

Automated user access request workflows with approval tracking and activity logging.

Designed RESTful APIs using Node.js and Express for CRUD operations and workflow management.

Integrated PostgreSQL for secure and scalable data storage.

Implemented PDF export for reports and activity logs to support compliance and audits.

Enabled auditable and compliant access management aligned with pharmaceutical regulatory requirements.

Key Skills / Technologies:-

React.js, TypeScript, Node.js, Express.js, PostgreSQL, JWT, RBAC, REST APIs, Swagger, jsPDF

Jain Catering Website

3 Months

Jain Catering Website

Project Description:-

Developed a responsive and user-friendly catering business website for Jain Caterers using React.

Designed multiple pages including Home, Menus, About Us, Our Chefs, Blog, and Contact.

Integrated dynamic blog content fetched from WordPress APIs.

Implemented modern UI with reusable components and smooth navigation.

Optimized website performance and responsiveness across desktop and mobile devices.

Deployed the website with production-ready build and SEO-friendly structure.

Key Skills / Technologies:-

React.js, JavaScript, HTML, CSS, REST APIs, WordPress API, Responsive Design
